

TRAINABLE ATOMIC OPERATORS

Shared operators for code evolution

Draft
create code

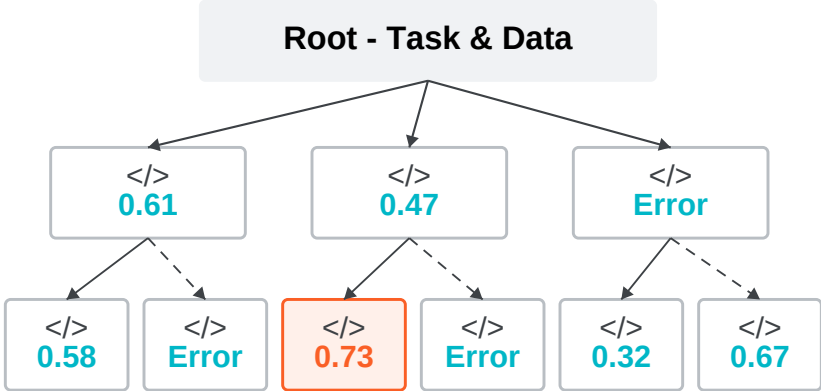

Improve
refine code

Debug
repair code

Crossover
merge parents

1 Evolutionary Inference

Operator-driven solution-tree expansion

Edges: D solid - I dashed - B dotted - X double

Inference loop

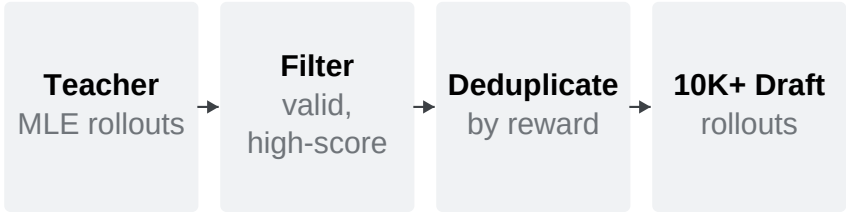

Scaffolds:

2 SFT on Executable Rollouts

Executable, high-score rollout supervision

- **Warm-start policy**
initializes RL policy

3 RL from Execution Feedback

Policy learning from sandbox rewards

Operator-conditioned RL
