

Curation Hierarchy

trading off quality and scale

Task Curation Funnel (Kaggle Competitions)

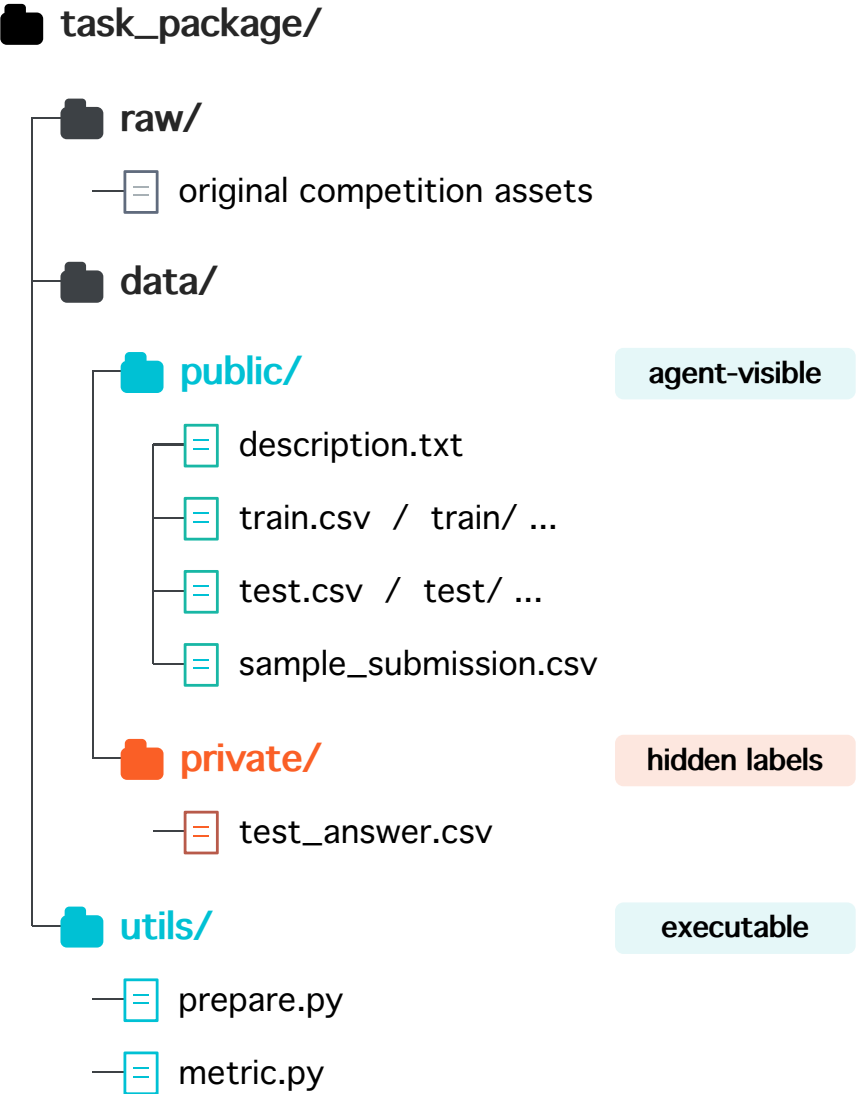

from the Meta Kaggle catalog to quality-gated tasks

Construction validation precedes the independent semantic quality gate

Executable Task Format

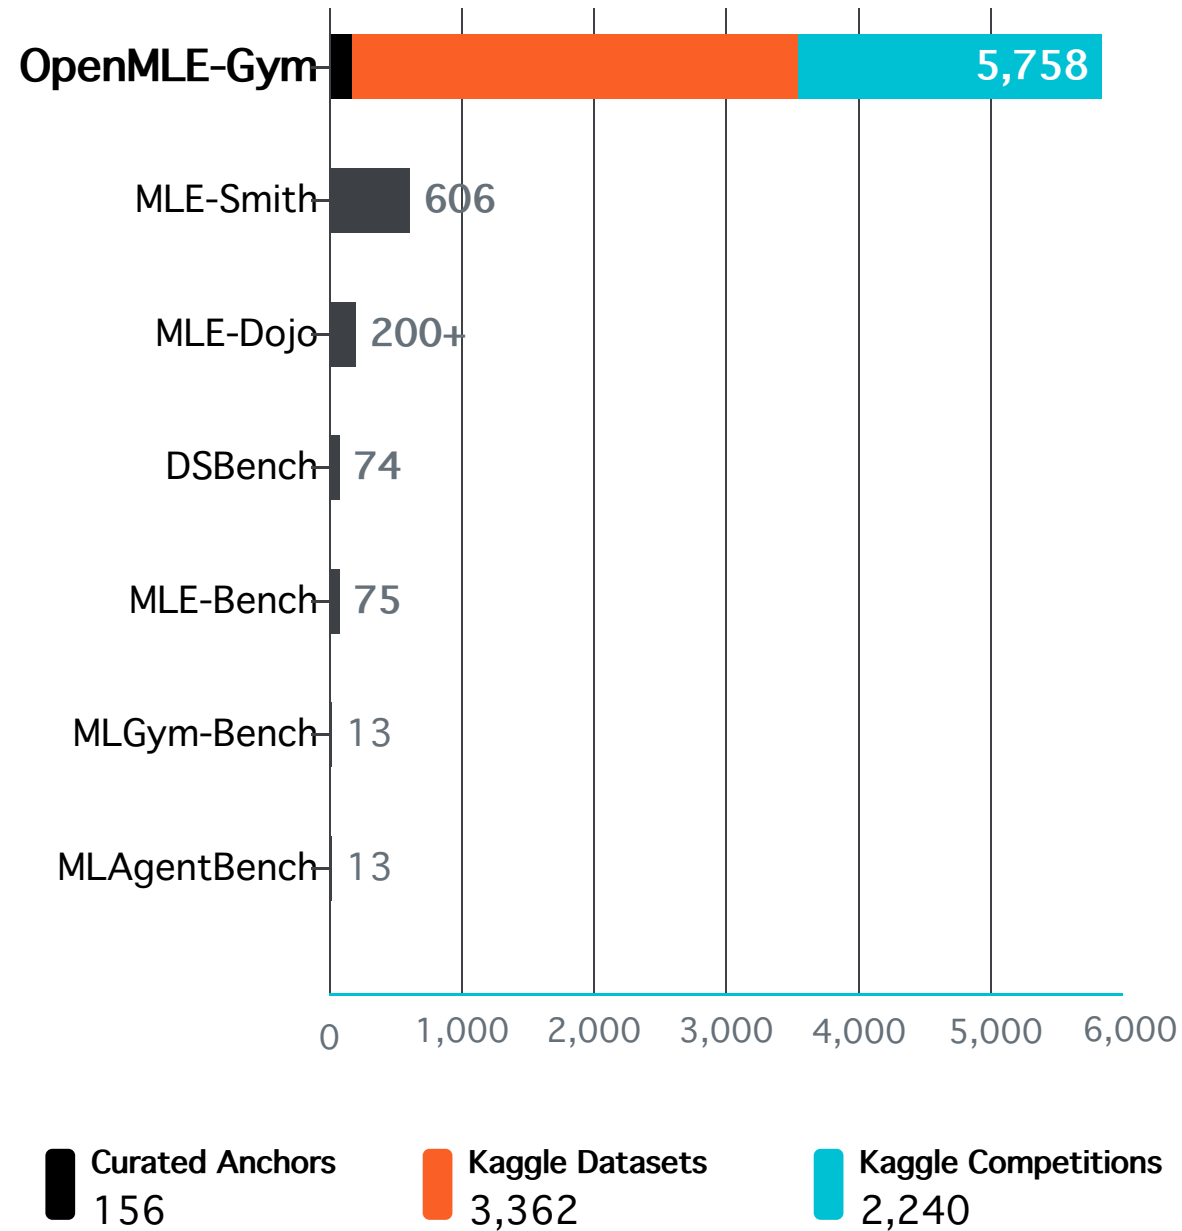

unified, execution-ready package

public inputs + private answers + executable metric

Task Scale

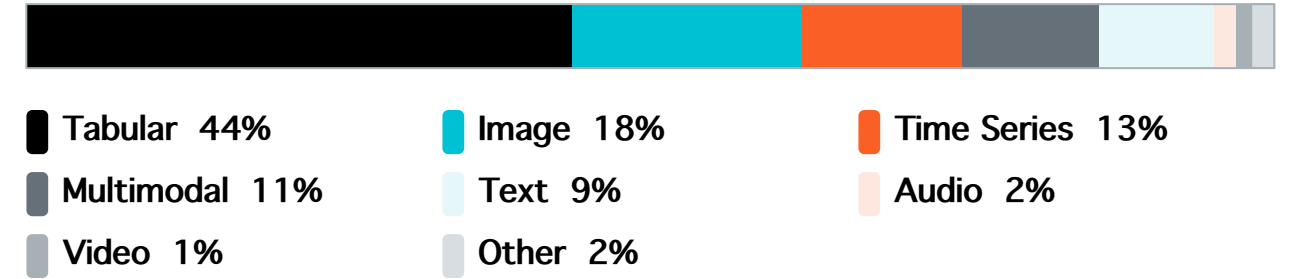

representative executable task-package resources

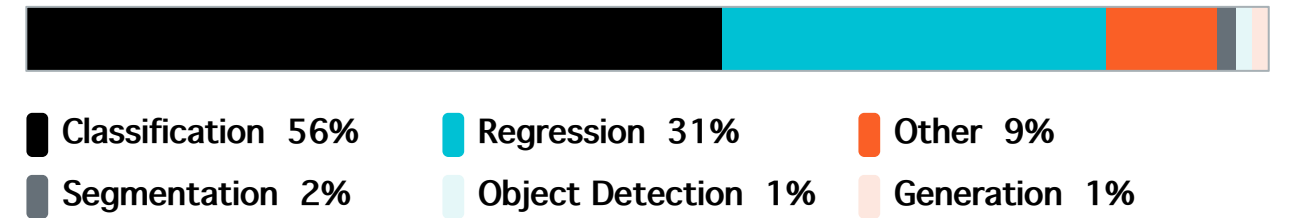

Dataset Distribution

normalized modality, task type, and non-raw package size

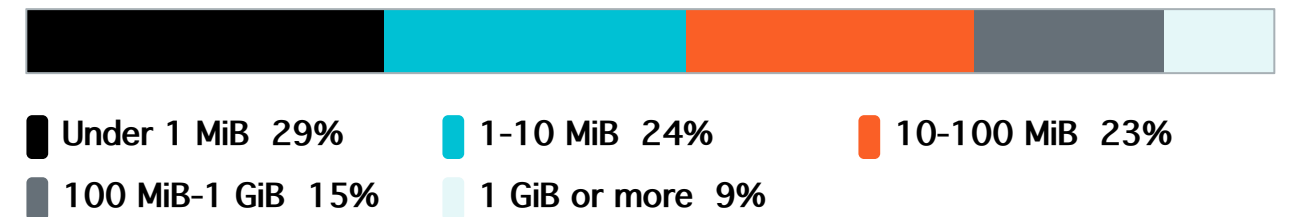

Modality Distribution

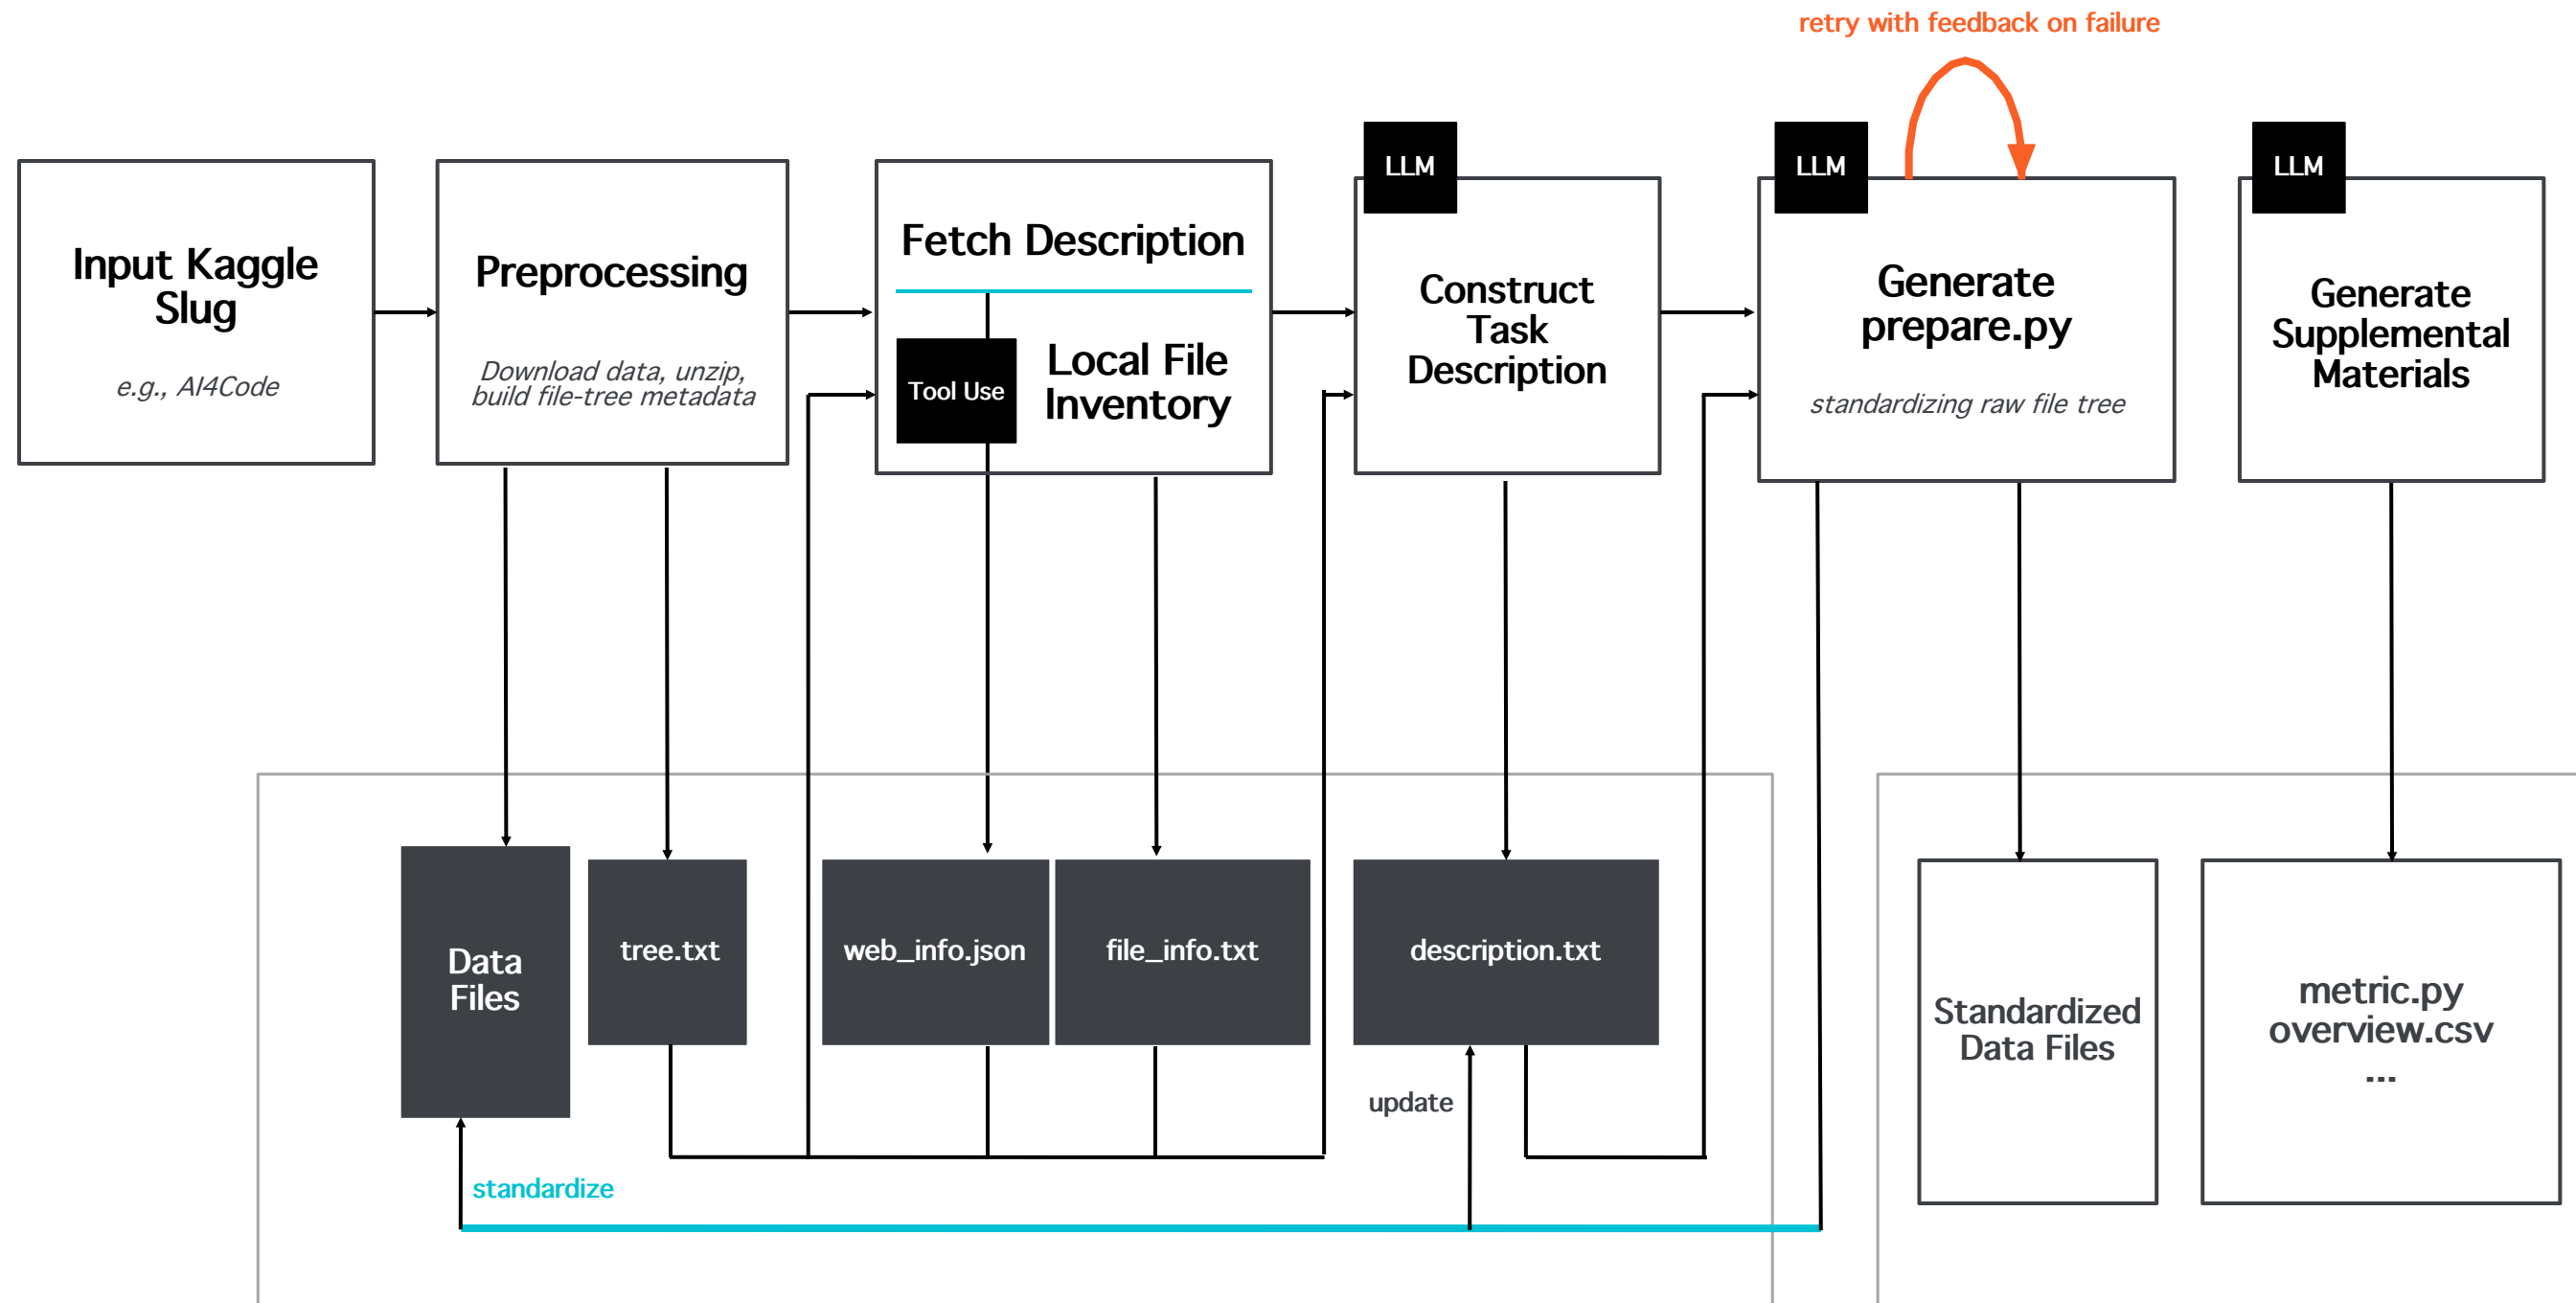

Task Type Distribution

Package Size Distribution

Task Package Construction

Task Package Construction Pipeline
